

7 – Affordable and Clean Energy

7.2 – By 2030, increase substantially the share of renewable energy in the global energy mix.

By investing in wind power, AKKC not only supports developments in renewable energy, but attempts to be an inspiration to other actors who likewise wants to participate in the promotion of renewable energy.

7.3 – By 2030, double the global rate of improvement in energy efficiency.

AKKC contributes to this target through the energy optimization of different parts of the house. This includes IT and technical equipment.
